

Notification of positive HPAI results in wild mammalian species (UK)

Table of the positive findings from a retrospective analysis of stored wildlife samples. The wild animals were found dead and sampled as part of wildlife scanning surveillance, with no suspicion of notifiable disease at the time of collection.

Species	Latin name	County	Date collected	Date tested	Outcome
FOX	<i>Vulpes vulpes</i>	CHESHIRE, ENGLAND	07/03/2022	12/08/22	1 X HPAIV H5N1
OTTER	<i>Lutra lutra</i>	FIFE, SCOTLAND	14/03/2022	12/08/22	1 X HPAIV H5N1
