Request to assess a pathogenic agent of terrestrial animals for inclusion in the WOAH List

To the WOAH SCAD Secretariat,

I herewith request that WOAH considers initiating the process to assess a pathogenic agent of terrestrial animals against the criteria in Chapter 1.2. of the *Terrestrial Animal Health Code* regarding its inclusion in the WOAH List in Chapter 1.3.

Pathogenic agent concerned:	
Terrestrial animal species concerned:	
Rationale supporting the request (less than 250 words)	
Rationale presented should refer to the main objective of listing, stated in Article 1.2.1. of the Terrestrial Animal Health Code*, and not to the specific criteria.* *Rationale should consider:* • *that there must be feasible actions under the mandate of Veterinary Authorities that, if effectively implemented, would reasonably be considered to prevent transboundary spread.* • *that, if there are pathways for transboundary spread beyond the risk management mandate of Veterinary Authorities, the value of listing in such circumstances would consider the significance of different potential pathways to the risk of transboundary spread, the feasibility of implementing risk management across all pathways, and the impact (benefits, costs) of risk management only on pathways under the mandate of Veterinary Authorities.* *Please provide a list of references and any supporting information as annexes.*
