

4th International Conference on Non Tsetse Transmitted Animal Trypanosomosis

Dear Colleagues

On behalf of organizing and scientific committee, we express our invitation of 4th International Conference on Non Tsetse Transmitted Animal Trypanosomosis (NTTAT) to be hold in Mongolia. Institute of Veterinary Medicine of Mongolia and National Research Center for Protozoan Diseases are willing to go-host the conference in August of 2019 at Institute of Veterinary Medicine, Mongolia.

The conference will cover all aspects of NTTAT, including parasite biology, pathogenicity, epidemiology, vectors, diagnosis and treatment. The trypanosome species that are covered are *Trypanosoma equiperdum*, *T. evansi*, and *T. vivax* as they are pathogenic to animals, in particular domestic species. We hope to see you all in Mongolia next year and to enjoy nomadic culture and sightseeing wild horses.

With best regards,
The organising committee

Battsetseg Badgar	Institute of Veterinary Medicine, Mongolia
Battur Banzragch	Mongolian University of Life Science, Mongolia
Inoue Noboru	Obihiro University of Agriculture and Veterinary Medicine, Japan
Keisuke Suganuma	National Research Center for Protozoan Diseases, Japan
Philippe Büscher	Institute of Tropical Medicine, Belgium
Nick Van Reet	Institute of Tropical Medicine, Belgium

Welcome to Mongolia
